<b>Eyes:</b>	Immediately flush eyes with water while lifting the eyelids and continue for several minutes. Get medical attention if irritation develops.
<b>Inhalation:</b>	Move the exposed person to fresh air. If irritation persists, consult a physician.
<b>Ingestion:</b>	If discomfort develops, consult a physician or poison control center. Do not induce vomiting unless directed to do so by a physician.
<b>Most Important Effects</b>	
<b>Acute:</b>	May be irritating to eyes.
<b>Delayed:</b>	No long-term effects are expected.
<b>Advice to Physician</b>	
	Product is of low toxicity. Treat symptomatically.

### **5. FIRE-FIGHTING MEASURES**

#### **Flammable Properties**

<b>Suitable Extinguishing Media:</b>	Water fog, foam, dry chemical, carbon dioxide or water spray.
<b>Unsuitable Extinguishing Media:</b>	Avoid solid stream of water if liquid is heated to ignition. It may spread burning liquid.
<b>Unusual Fire And Explosion Hazards:</b>	Sealed containers can rupture violently when exposed to fire. Decomposition products may include the following materials: Carbon dioxide Carbon monoxide
<b>Special Fire Fighting Precautions/Instructions:</b>	Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

### **6. ACCIDENTAL RELEASE MEASURES**

<b>Emergency Procedures:</b>	Immediately contact emergency personnel. Eliminate all ignition sources. Keep unnecessary personnel away.
<b>Personal Precautions:</b>	Use suitable protective equipment (section 8). Follow all fire-fighting procedures (section 5). Do not touch or walk through spilled material.
<b>Protective Equipment:</b>	Wear suitable personal protective equipment including hand and eye/face protection and suitable clothing for the task being performed.
<b>Environmental Precautions and Clean Up Methods:</b>	(See Section 8 for recommended personal protective equipment.) Small spills: Soak up with absorbent material such as oil-dry or vermiculite. Place into containers but DO NOT seal them. Arrange for disposal. Large spills: Dike spill and pump into suitable containers for disposal. Do not allow to enter natural waterways or sewers. Ventilate area during cleanup.

**Spills and releases may have to be reported to Federal and/or local authorities. See Section 15 regarding reporting requirements.**

### 7. HANDLING AND STORAGE

<b>Normal Handling:</b>	Avoid contact with skin and eyes. Do not breathe product mists if formed. (See Section 8 for recommended personal protective equipment.)
<b>Storage Recommendations:</b>	Keep containers closed during storage. Store away from moisture, isocyanates and oxidizing agents. (See Section 10 for hazards associated with contamination.) Do not roll drums. Move drums with fork lifts equipped with “parrot beaks” or drum clamps. Product life is approximately 360 days when stored between 50 & 120 °F (10 & 50 °C) under an inert atmosphere such as nitrogen. Do not allow product to become contaminated with other materials.

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

<b>Engineering Controls:</b>	Good general ventilation should be sufficient for most conditions. Local exhaust ventilation may be necessary for some operations including transfer of liquids.
------------------------------	--

#### Personal Protective Equipment

<b>Skin Protection:</b>	Wear rubber or neoprene gloves and long-sleeved shirt. A rubber apron is recommended for liquid transfer operations.
<b>Eye Protection:</b>	Wear safety glasses with eye-shields or chemical safety goggles. Avoid the use of contact lenses for liquid transfer and handling operation.
<b>Respiratory Protection:</b>	Not required for properly ventilated areas. For areas containing product mists, use an air purifying respirator equipped with an organic vapor cartridge
<b>Additional Recommendations:</b>	A source of running water such as a safety shower and/or eyewash station is recommended in the work area.
